Breakout Session Questions

UNIVERSITY OF GEORGIA
Institute for Resilient Infrastructure Systems

Capacity, Data, and Expertise Needs

- **Capacity and Expertise Needs:** What are the most critical capacity gaps (staffing, training, technical skills) in your region for effective resilience planning?
- **Data and Information Requirements:** What types of data are currently inadequate or missing for informed resilience decision-making?
- **Long-Term Strategic Planning:** What long-term strategies are necessary to sustain and scale resilience efforts? What should a statewide effort look like?

Coordination, Collaboration, and Policy Support

- **Statewide vs. Local Coordination:** Where should statewide coordination take the lead, and where is local autonomy more effective for resilience planning?
- **Stakeholder Collaboration:** How can we enhance collaboration between state agencies, local governments, and community stakeholders?
- **Policy and Regulatory Support:** What policy changes or regulatory supports are needed to empower local resilience actions?

Funding, Implementation, and Success Measurement

- **Resource Allocation and Funding:** What funding models would best support both statewide and local resilience needs?
- **Near-Term Priorities:** What are the most urgent short-term functions or actions needed to improve resilience in your community?
- **Measuring Success and Adaptation:** What metrics should be used to measure success, and how should plans be adapted over time?
