

What is Flying Angels?

We are flight nurses and doctors who accompany patients on commercial airlines, both domestically and internationally. Whether a senior citizen needing assistance or a patient with complex medical conditions, our team works together seamlessly. Our flight coordinator manages all the logistics, while the flight nurse delivers specialized, bedside-to-bedside care.

What Flying Angels is not.

We are not an air ambulance service.
We do not operate our own planes.
We are not a charity.

When a patient doesn't require an air ambulance but can't travel alone, Flying Angels offers a cost-effective alternative.

Our clients often say we are heaven-sent!

Wondering if Flying Angels is the right fit for your case?

Contact our team today for a free, no-obligation consultation. We're here to serve as a helpful resource for you.
