Self-Care Assessment

Self-care activities are the things you do to maintain good health and improve well-being. You'll find that many of these activities are things you already do as part of your normal routine.

In this assessment you will think about how frequently or how well you are performing different self-care activities. The goal is to help you learn about your self-care needs by spotting patterns, getting new ideas, and flagging areas that are lacking.

There are no right or wrong answers on this assessment. For example, giving something a low rating doesn't necessarily mean it's important to act upon. Focus on what's important to you.
